
This little piece of trash leaves a ton of damage.

When you notice a piece of trash, please stop and dispose of it properly. Your rivers, creeks and lakes depend on you. What isn't collected today is picked up in the next rainstorm and sent directly to the nearest creek. From the moment this small piece of trash enters our waterways, it is responsible for so much damage. Together, with your help, we can make a difference in keeping our water clean.

The Douglas County Stormwater Co-op Group is comprised of representatives within local government agencies in Douglas County, teaming together to protect water quality within our district boundaries. Look for this ad in coming months for helpful tips on how to keep our water clean and ways you can get involved.

Please report accidental and illegal dumping to your local agency.

We take this so seriously that we posted this ad rather than send you more garbage in the mail.
